STATE TREASURY GIVEN BOOST BY FRISCO FEES

Jefferson City, Aug. 28.—The St. Louis & San Francisco Railroad company has paid into the state treasury \$51,534.58 of fees charged by the state public service commission for approving its new issue of securities. Early last week it paid into the treasury \$225,064 as incorporation tax, and fees from the secretary of state's office, making a total for the week of \$276,598.58. All of the money goes into the revenue fund, which was down to about \$46,000, or not enough by \$30,000 to pay the August salaries. The Frisco money will bridge over the shortage for at least two months to come.

PURE MILK FOR GOOD HEALTH.

Baby's Supply Should Not Be Changed to Other Sources Which Might Spread Typhoid.

Pure, clean, sanitary milk is necessary for babies and very important in the health of children and grown-ups. During this summer season when there is especial danger from typhoid, infantile paralysis, or other diseases which may be transmitted through the milk supply, it is especially important to patronize only those whose premises are carefully kept in accordance with the best methods prescribed by the inspectors. No change should be made from a supply that has been giving good results unless there is reason to believe that the new milk supply will be distinctly better.

Fortunately, cows are subject to but few diseases that are dangerous to milk users. If a cow appears to be in good health and has no indications of udder inflammation, she can be counted on to give wholesome milk provided she is free from tuberculosis. The only way to be sure she is free from this disease is to have her tested by a competent veterinarian.

To keep dirt and bacteria out, the cows must be kept clean, especially in the region of the udder. The milk should be drawn into a covered pail which is thoroughly washed and scalded after each milking. Only good clean water should be used for this purpose.

No matter how carefully milk is produced difficulty will be experienced in keeping it sweet if it is not kept cool until consumed.—Percy Werner, Jr., Missouri Agricultural Experiment Station.

A SHORT STORY

A tall girl, named Short, who lived nowhere in particular, loved a certain big Mr. Little; well, Little, little thinking of Short, loved a little lass, who lived near by, whose name was Long. Well, to make a long story short, Little proposed to Long, and this made Short long to get even with Little's shortcoming. So Short, meeting Long, threatened to marry Little, before Long; this naturally caused Little to marry Long, before long. Now the question is: Did tall short love big little less, because Little loved Long? We leave it to you.—Exchange.

ACCOUNTS

We have been very lax with the collection of our accounts. We have shown a fraternal disposition to extend credits for long periods, which is positively hurtful to business, more especially when you understand that we have conducted our business on the basis of very small profits.

There is no valid reason why accounts should not be settled every fifteen days—or, at the farthest, every thirty days—except in cases of unusual misfortune. In such cases we are always cheerfully willing to accommodate our customers.

We need the money, and kindly request that our friends settle their old accounts.
